GRADE SCHOOL

| Read to Lead | Write Away! | Math Magic |
|---|---|--|
| <p>This Reading Program is customized to meet the need of your child. Each lesson presented is something well-planned to provide steps to the child's success.</p> <p>More than learning how to read with ease, confidence, comprehension and fluency, this Reading Program develops love for reading and life inspiration.</p> <p>Equip your child with this powerful tool for learning because the bulk of studying requires lots of reading. Ideal for the child enrolled in other schools who needs to develop reading skills or the love of it.</p> | <p>Children have been burdened by writing as they are swamped by tons of rules to remember. By the time you begin to write, energy has been sapped and the blahs and burden have set in.</p> <p>Learn from the professional writers how to bust the writer's block and break the burden This is an adventure in simple yet creative writing that elevates into success as the daily practice of writing is enjoyed by the young writer. The writer learns how to enjoy writing before his readers do. Passion has to be kindled for one can only write when one has something to think and talk about.</p> | <p>This is much better than the typical Math Programs. Preppi presents the magic in math that will unlock the appreciation of the child to the wonders and necessity of math in practical daily living. Make math work in your child's life through experiential learning. The use of manipulatives concretize abstract concepts. These Math Series will allow the child to grasp the concept, articulate it and develop the fluency. The child will not be drowned in drills but will have enthusiastic exercises that will hone the math skills through practical play and work.</p> |
| <p>This Special Reading Program Rages with Reality Reading: Truths better than Tales and Facts over Fiction that boost emotional and brain development.</p> | <p>Confidence-building skills, Self-discovery, Imagineering Exercises, and Vocabulary Boosters will also be presented.</p> | <p>Exercises on Math Memory Muscles, High Order Thinking and practical problem-solving skills through play and practice.</p> |
| <p>Impressionable at their young age, real quality books (not text books) offer a wealth of inspiration and knowledge that stir the imagination to new interests and innovations.</p> | <p>This program will also allow a few minutes of reading and brief discussions to fuel the writer's mind for ideas.</p> | <p style="text-align: center;">Definitely, Math at your fingertips.</p> |
| Min of 10 sessions | | |
| Max. of 40 sessions | | |
| Choose the number of sessions you care to enroll your child. | | |
| An Assessment on your child has to be made and the Preppi Consultant will customize the training for your child. | | |
| Choose the Training Track for your child. This will be presented by the Preppi Consultant upon Enrollment and Post- Assessment Parent Discussion. | | |
| Discuss the Training Track and 1-2 Areas you want your child to achieve for the summer. | | |

|--|---|--|---|--|
| <p>An explosive and exciting exploration that combines smart and sensible science spruced with lots of silliness too. Unlock answers on scientific queries through a multi-sensorial quest utilizing lots of handy tools and gadgets. This course guarantees confidence-building skills and enables the child to articulate and perform science tricks and techniques.</p> | <p>A top fave for both young gals and guys as it provides gustatory delight while learning math concepts and positive behavior. Professional kitchen practices, from learning the labels and tackling the tools, are presented before kids cook up a storm of appetizing proportions. Math becomes delicious and focus and control are a motivation to reach the yummy end goal.</p> | <p>This course educates the child on how to develop life skills while mastering important math concepts. The child will realize that more than an academic subject, math is a tool for daily living. Principles and practice merge in this fun real life undertaking as the child grapples with healthy and wise choices to make, management of funds, accountability and math operations.</p> | <p>Deliberate planning, making careful choices and math know-how will prepare the child on how to save for the future, do financial and learn how the adults manage their funds in the real world. Basic fluency in math operations as well as percentages, decimals and fractions will be reviewed.</p> | <p>Journey to top cities of the world, ride the Preppi Plane and apply the travel sense to have a successful trip. Learn what is involved in traveling from applying for a passport and a visa, booking a flight, how not to get lost in an international airport, understanding international signs and planning an itinerary, fashion sense for different time zones, etc.</p> |
| <p>Develop science sense and keen appreciation for the Master Builder and Designer of the scientific world we live in.</p> | <p>Mathematics of Character Building and You Measure Up exercises are presented for EQ Boosters.</p> | <p>Involves real world professional accounting, basic math calculations and use of accountable forms like Invoices, DR's and OR's, as well as online shopping.</p> | <p>Real world professional fund management, audit and balancing a checking account, and problem-solving skills will be exercised.</p> | <p>Travelogue and other Geography lessons, reading maps, filling up government forms, Wait Training and Thinking exercises are presented</p> |
| <p>The child will do a series of science experiments and Do-It-Yourself projects.</p> | <p>Table manners, the art of dining and gracious hosting and serving will be taught in this course as children enjoy their concoctions.</p> | <p>Math grades do not reflect integrity, accountability and ability to make wise choices. This course will instruct children to aspire for such ideals.</p> | <p>The child will be given an option to open his/her own bank account in Pasig if the parent allows.</p> | <p>This is a multi-sensorial course: sights, sounds and tastes of different cultures will be presented.</p> |
| <p>While all the materials for the course will be provided, some recycled and other items have to be supplied by the child as per science project selected.</p> | <p>Children will be allowed to bring home some of their treats if they choose to have some left overs! Send in food keepers just in case.</p> | <p>Preppi brings in the FUN in these special FUNKy LIFE SKILLS Training, a FUNctional Literacy Series of Lessons. Many children make the grades but fail in functional literacy. It is not enough to learn how to read, write and do math. What is more important is to know how and when to practice theories and skills coupled with high order thinking. Young children learn how to understand adult requirements and forms, and make wise decisions drawn from the basic academic concepts and life skills they learn.</p> | | |
